Function

FUSERBLOC NFC/DIN are manually operated multipolar fuse combination switches.

They make and break on load and provide safety isolation and protection against overcurrent for any low voltage electrical circuit.

This range is available in right front-side, left side and central front, direct or external operation, with 2, 3 and 4 poles and up to 1250 A.

Advantages

Optimum safety

Complete isolation of the fuse with double breaking per pole (top and bottom of fuse) and positive break indication keep people and equipment protected from overcurrent.

High breaking capacity

Protection against overloads and short circuits thanks to high breaking capacity fuses (100 kA rms).

Multi-use

Fuserbloc can be equipped with a front or side operation handle, mounted directly on the product, or externally on the door or on the side of an electrical enclosure or cabinet.

Simplified use

TEST position for testing control circuits without energising the power poles using U-type auxiliary contacts. In TEST position, the enclosure door can be opened.

- Up to 690 VAC.
- Up to 100 kA.
- Available in versions with right front-side, left side and central front operation handles.

What you need to know

- In addition to the FUSERBLOC NFC/DIN rating, product selection also depends on the fuse characteristics and functional specifications. The SOCOMEC FUSERBLOC NFC/DIN can be equipped with **NFC/DIN** fuses (for BS fuses: please contact us)

1. FUSERBLOC fused combination switches, right front-side operation
2. External front or side operation handle
3. U type auxiliary contact (pre-break and switch position signalling)
4. Auxiliary power contacts (position signalling)
5. Blown fuse mechanical detection and indication device (DDMM)
6. Incoming and outgoing terminal shrouds
7. Integrated solid neutral link
8. Electronic fuse monitoring device (FMD) detects fuse status and provides signals to operator, PLC or supervision systems. Compatible with BS88, DIN and UL fuses
 - LED visual indication
 - Bi-stable relay for PLC: alarm, remote device tripping, etc.
 - TEST button: provides functional product verification
 - Can be directly mounted to FUSERBLOC NFC/DIN, alternatively it can be DIN-rail, back-plate or door mounted
9. Direct operation accessory.

- Whether it is 3 pole + switched neutral or 3 pole + solid neutral, the CD 25 to CD 32 A FUSERBLOC NFC/DIN with **direct** and **external operation** is the best suited solution in a compact design.
- For ratings CD 25 to 400 A, the **flat mounting kit** is ideally suited to plug-in drawers.
- Maintenance of outputs from the DC common bus.
